Dixie X Hemp CBD 500mg Dew Drop

TestID
DED10.12.12-2

Sample Type
Tincture

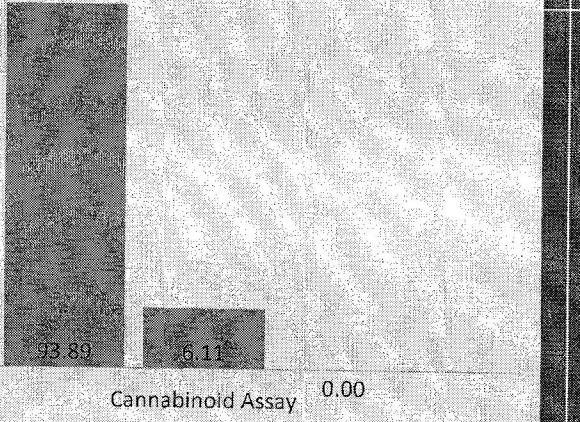

The below test is reported in percentage by weight, milligrams per gram, or milligrams per final consumable weight. THC-A is not decarboxylated (not active) and shall not be reported in the total active cannabinoids. THC-A is converted to active THC in the calculated active column using the formula (THC-A × .877 = THC). Total assayable cannabinoids simply represents the sum of the cannabinoids detected in the sample. If THC-A is not detected in the sample, the calculated active and total active will remain the same. Edible results may be lower than expected, this is due to circumstances outside of CannLabs control, such as cannabinoid material adhering to the manufacturer's packaging. This report and all information herein shall not be reproduced, except in its entirety, without the expressed consent of CannLabs. This report is for informational purposes only and should not be used to diagnose, treat or prevent any medical related symptoms.
